

Popular Decodable Readers for Digital Phonics Instruction

Bob Books

Created by a teacher, right from the start Bob Books fosters success, confidence, and a love of books in children that are learning to read and inspire.

MultiLit

MultiLit is a program developed by Macquire University that aims to help children with reading difficulties.

- ✓ Early Literacy Preparation
- ✓ Decodable Readers
- ✓ Literacy Intervention

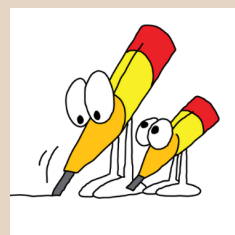

Sounds-Write First Rate Phonics

Sounds Write offers a comprehensive system in teaching, reading, spelling, and writing. The primary aim is for Sounds-Write to be used as a beginning reading program that starts when children enter Primary School in Reception (age 4-5) and which is then taught throughout Key Stage 1 (age 5 - 7), before fine-tuned in Years 3 and above (Key Stage 2, ages 7-11).

Little Learners Love Literacy

Little Learners Love Literacy provides various products (decodable readers, games, apps, etc.) dedicated to teaching phonics to young children.

Decodable Books for Struggling Readers:

PhonicBooks & resources develop the 5 pillars of learning to read: phonemic awareness, phonics, vocabulary, fluency, and comprehension. At a later stage, students learn about morphemes (units of meaning) to enhance their vocabulary & comprehension.

Songbirds Phonics by Oxford University Press has a fantastic breadth of storylines, rhyme, rhythm, and genres. Systematic structure and levelling to guarantee progress and a wide range of illustration styles brings each story to life.
